

## **ABSTRACT OF THE DISCLOSURE**

A system and method for addressing the paradoxes and problems associated with the Knowledge Economy, and the transition to it. The system and method of the present invention create a unified experience of work that scales from individual thought processes to the building and using of a global system of commerce. Described in several levels of recursion, the system and method of the present invention integrate, into a single system and method several discrete Sub-Systems and methods that comprise a myriad of now unintegrated tools and processes that are conducted across contradictory and non-collaborative environments.
